What's on offer

Our National Fuels framework provides a fully EU compliant route to market for all types of fuels and associated services for the public sector. This framework is a new and improved version of our Liquid Fuels framework, which had a 100% customer retention rate. The new framework offers all the fuel types that were provided through the Liquid Fuels framework and much more:

Lot 1 Bulk liquid fuels, provision of bulk liquid fuels for heating oil and road fuels. (This will be subdivided into 14 regional lots)

Additional fuels now available

Lot 2 Liquefied gas, provision of bulk and bottled liquefied gas

Lot 3 Solid fuels, provision of solid fuels including wood

Lot 4 Greases and lubricants

Lot 5 Associated services, provision of ancillary services associated with the supply and use of liquid and solid fuels such as tank services, fuel testing and cleaning, waste removal

Why work with us

Our National Fuels framework delivers a wide range of fuel options suitable for the whole of the public sector, whether you require a regional or national supplier.

By using our frameworks you can benefit from:

support - we aim to make your life easier by ensuring KPIs are met. We also support further competitions under Lot 1 and 2 of the framework and provide access for customers to run their own call offs when required

stability - all our suppliers are assessed during the procurement process for their financial stability, capability and price before being awarded a place on the framework

savings - bulk further competition by eAuction drives down price to provide competitive supply margins

customer service - we pre-agree terms and conditions

extensive experience - we provide advice and resolve your queries; and carry out customer surveys to ensure you're satisfied

choice - clear and transparent pricing options

We saved £1.6 million for our Liquid Fuels customers last year across 6000 sites (16/17)
