## Supplier Profiles

<b>Supplier Registered Company Name</b>	<b>Supplier Trading Name</b>	<b>SME</b>	<b>Profile</b>
6Point6 Cloud Gateway Limited	Cloud Gateway	Yes	London based SME Cloud Gateway provide a hybrid cloud connectivity Platform-as-a-Service (PaaS), which securely and rapidly connects anything on the customer estate with multiple cloud service providers, the PSN, HSCN and the internet. As a central enforcement point at the heart of the network, Cloud Gateway helps businesses to operate cloud, hybrid cloud and multicloud environments, whilst removing the burden and complexity associated with networking and security.
Accenture (UK) Limited	Accenture (UK) Limited	No	Organisations need to embrace innovations, fit-for-purpose technologies and flexible platforms to rapidly assemble solutions to address their challenges. Accenture has a critical differentiator: our Innovation Architecture. From research, ventures and partnerships, to labs, studios, innovation centres and delivery centres, we help organisations imagine the future and bring it to life. Our focus on New IT, delivered through pilots, but with an eye to scaling up to full scale projects, accelerates the adoption of innovation within the Public Sector. Areas of interest includes innovation around Digital Identity, Blockchain, Robotics, Artificial Intelligence Cloud and Security, to name but a few – helping organisations solve their problems in new ways.
Affinitext UK Limited	Affinitext	Yes	Through superior AI technology, Affinitext's Intelligent Document Format (IDF) is transforming of contract management, globally. Intelligent documents optimise performance and enhance understanding, allowing users and their organisations to achieve more and spend less. Used by governments, industry leaders and blue-chip organisations around the world, Affinitext proudly provides its customers with either an unparalleled collaborative way of working, or an unfair competitive advantage, as the case may be.
Agilisys Ltd	Agilisys Limited	No	Agilisys deliver a range of innovative solutions to our clients across the public sector. In particular, we have developed robotic process automation solutions in partnership with leading providers to deliver significant cost saving solutions. Most recently we have been developing data solutions, that significantly improves the join up of data across teams and sectors. Agilisys will partner with you to deliver positive outcomes for citizens across the UK.

## RM6094 Spark DPS Supplier Profiles/continued...

Airbus Defence and Space Limited	Airbus SE	No	The UK based Intelligence business of Airbus Defence and Space, comprising 180 employees, is specialised in data acquisition, fusion, management and analysis focussed on location, allowing clients to make informed decisions. Working with Central Government, Fire & Rescue Services, Police, Health, Justice, Local Authorities, Transport and Insurance industries, Airbus provides innovative solutions using proven technology to solve customer problems. This can include satellite data acquisition, geospatial data processing, tracking, analytics, Artificial Intelligence (AI), 3D environments, automation and secure data management, as both hosted and on-premise solutions. The team brings multi-sector and multi-national experiences to offer proven technology and solutions, together with knowledge transfer, delivered in an agile environment. Solutions are delivered working in partnership with the customer, providing value for money to the public sector.
Alivecor Limited	Alivecor Ltd	Yes	AliveCor's mission is to save lives and transform cardiology by delivering intelligent, highly-personalised heart data to clinicians and patients anytime, anywhere. KardiaMobile technology allows a medical-grade single lead and six lead ECG anytime, anywhere. In just 30 seconds, detect Atrial Fibrillation, Bradycardia, Tachycardia or Normal heart rhythm on a smart device using the Kardia application
Amido Ltd	Amido Ltd	Yes	Amido are a vendor agnostic organisation that provide our customers independent advice based purely on captured business and user requirements. We implement new digital services taking a user-centric, cloud native and low-code approach. Amido has delivered innovative solutions for the Public Sector and housing projects in the areas of IoT, Artificial Intelligence/Machine Learning, data strategies and data lakes and security related IdAM projects for MoJ, NHS, MoD, DVLA, Companies House and more.
Ansava Limited	Ansava Limited	Yes	MyPillCheck is a 24h web based tele-medicine solution, which provides seamless interaction between patients and medical practitioners. It automatically processes patient requests in a flexible and convenient user friendly manner for patients, while reducing pressure on practices who maintain capitation fees. It is GDPR compliant, has cyber security certifications attributed, and already deployed at several UK practices.
Art Healthcare Software Ltd	psHEALTH	Yes	Our platform, Advanced Referral & Triage (ART), automates the referral process and supports clinical triage and patient communication in a single platform leveraging a rules-engine supported by AI. We support both complex and simple patient transfer/referral processes with a system that is tailored for local service pathways and needs. We remove up to 95% of manual work, enable faster processing and collect valuable data to optimise pathways.

## RM6094 Spark DPS Supplier Profiles/continued...

Ashwoods Lightfoot Limited	Ashwoods Lightfoot Limited	Yes	Lightfoot are a Newton Abbey based SME which started in 2013. They have been helping businesses and drivers save fuel and reduce emissions ever since and, today, their technology is used by 200 businesses with over 30,000 drivers who have trusted Lightfoot to improve their fleet performance and deliver a return on investment. Lightfoot uses engine efficiency to inform driver feedback in real-time that coaches safer, smoother driving habits. The Lightfoot unit captures all the data and transmits it back to us.
Atchai Limited	Atchai Loqativ	Yes	Atchai delivers intelligent applications driven by proprietary and open source technology. We specialise in conversational AI (chatbots), NLP, machine learning, reinforcement learning, data science and blockchain. Our conversational AI platform - Loqativ - can reduce call centre costs and improve resolution times by providing instant answers and guiding citizens through complex procedures.
Awell Health	Awell Health	Yes	Digital care pathways improve patient outcomes, improve productivity and reduce burnout risk among care teams. Awell Health provides an award winning platform to easily create, validate and share digital care pathways - available for free - and a paid version that integrates seamlessly with EPRs and enables execution of these pathways for individual patients.
AWTG Limited	AWTG Ltd	Yes	AWTG specialise in developing innovative and scalable solutions for the new opportunities brought by 5G, WiFi-6, Artificial Intelligence, Machine Learning, Internet of Things, Smart Health and the rapid advancement of technology. With new ways of disseminating and interacting with information such as AR/VR/MR and Holograms, AWTG has a range of core applications and services with a team of highly competent engineers ready to help the public sector deliver immersive and exciting user experiences including consistent experience for Health ICT. If you're not sure what you need, our Subject Matter Experts can help develop use cases and business cases identifying the most effective way of achieving your desired outcomes – then deliver to time, budget and specification
BDM Medical Limited	Doctaly, Doctaly Assist	Yes	Doctaly Assist is a Remote Patient Monitoring (RPM) platform designed to maximise patient adoption and allow clinicians to rapidly assess patients. The platform supports the monitoring of all Long-Term Conditions (LTCs) including asthma, diabetes, hypertension, COPD etc as well as diseases such as COVID. Key features include integration with WhatsApp, iMessage and SMS, so patients do not need to install Apps or create accounts. In addition, the platform has a "Virtual Ward" capability so triage and assessment of patients can be distributed based on risk, to appropriately trained members of the team. The platform integrates with EPR systems using the NHSX MESH protocol and supports the automatic registration of patients for rapid onboarding. The platform has been designed to be highly flexible allowing rapid iteration of clinical flows to suit all relevant use cases.

Becrypt Limited	Becrypt Limited	Yes	The Paradox operating system reduces cyber security risks and ensures that your endpoint devices (desktops, laptops, thin clients, kiosks) always boot into a ‘known good state’ free of any malware or compromise. Developed in collaboration with UK Government, and optimised for endpoints accessing cloud or VDI based resources.
Binary10 Ltd	Binary10	Yes	Binary10 is a Data Services Innovator SME based in Swindon. Binary10 specializes in Data Strategies that improve the way an organisation can manage and enhance its data. They also provide innovative solutions on how data can be migrated or integrated across organisational systems in an efficient and secure manner.
Biosite Systems Limited	Biosite Systems Ltd	Yes	Biosite's Access Control system utilises market-leading biometric and wireless technology to provide real-time visibility of your workforce, on site and at group level. The system captures accurate, real-time operative data using a range of devices, to optimise operational efficiency, improve health and safety and ensure compliance. Putting you in control.
BJSS Limited	BJSS Limited	No	BJSS helps organisations define, design and deliver innovative products and services using advanced technologies and design thinking. BJSS uses a range of approaches, from week-long design sprints (to research and test out ideas by building low cost, light-touch working prototypes) to launching new products and services via MVPs. BJSS' 25+ year heritage and strong GDS expertise means it is well-versed in scaling innovative solutions (such as AI, IoT and machine learning) to enterprise scale.
Black Space Technology Limited	Black Space Technology Ltd	Yes	Black Space Technology specialises in scalable and future proofed mobile telemedicine and telehealth software solutions and COTS hardware. The core downloadable mobile digital platform is easily configurable to individual clinical needs including language localisation. There are 3 modules: Rapid EPR – multi language EPR, vital sign monitoring and telemedicine platform for use in prehospital care, ambulances and remote environments. Rapid Mobile Care – wearable biometric platform for remote patient monitoring with customised digital care plan. Rapid Triage – Real time situational awareness for monitoring mass casualty incidents including pandemics including track and trace and hospital resource availability.
Built-ID Limited	Built-ID Limited	Yes	Give My View is a web-based, digital platform that makes it easier for decision-makers to get more value out of community engagement. Its gamified frontend design features mean that higher volumes of diverse community members are engaged, compared with traditional face to face methods. The platform ultimately allows decision-makers such as councils, developers and employers to make data-driven decisions that have been influenced by the community

## RM6094 Spark DPS Supplier Profiles/continued...

Business Finance Technology Group Limited	Openwrks Group	Yes	Give your customers a digital, more accurate, and more engaging way to complete Income and Expenditure assessments. OpenWrks MyBudget is fully integrated with Open Banking and Credit Reference Agency data, which can be consumed through co-branded or referral engagement models.
Business Systems (U.K.) Limited	Business Systems UK Limited	Yes	Business Systems (UK) Ltd is the UK's largest independent provider of Call Recording and Workforce Optimisation technologies. We are entrusted by both public and private institutions with implementing innovative projects which unlock effective answers to customer and employee challenges. Today, we are the partner of choice for many public sector organisations such as the Home Office and National Air Traffic Services (NATS). Throughout our 30+ years of providing this transformative technology, we have added value to every project by ensuring streamlined integration and deployment, so our customers can enjoy a fast return on their technology investment.
Canary Care Global Limited	Canary Care	Yes	Canary Care is a passive activity monitoring system that uses sensors, placed around a residence, to gather information about daily routines, by detecting movement, door activity, temperature and light levels and visitors to the property. The data can be viewed in our web/mobile apps, making it easy to see current activity, as well as spotting longer term trends or behavioural changes, and alerts can be sent by email, text or app notification, to confirm that everything is okay or flag a potential issue. Canary Care is used by local authorities, and care/housing providers to acquire objective evidence to enable informed care decisions, allow earlier preventative support/treatment and deliver proven savings by ensuring that care levels are correct.
Carbon Free Group C.I.C.	Carbon Free Group	Yes	Carbon Free Group have over ten years delivering zero carbon buildings. We provide services on mechanical and electrical design, installation and access to innovative, leading edge companies. We deliver highly innovative, ultra-low energy and zero net carbon buildings for our clients.
Casqol Limited	Silverwing	Yes	Silverwing is a smart digital infrastructure that enables public sector organisations to automatically aggregate their purchases with others, driving more value in purchasing and faster adoption of new technologies.
CDL Group Holdings Limited	CDL Group Holdings Limited	No	CDL is a technology company offering many innovative solutions, including specialisms in data services for high volume organisations, vehicle information services, cloud services consultancy and insurance pricing/administration systems. The company is financially strong and has over 600 employees based in Stockport, UK.
Cievert Ltd	Cievert, Cievert Ltd	Yes	Cievert provide digital solutions to healthcare providers. This includes clinical workflow management platforms to improve referral efficiency and automated patient monitoring to unnecessary appointments. Their solutions are used in numerous NHS Trusts across the UK

## RM6094 Spark DPS Supplier Profiles/continued...

Cineon Training Limited	Cineon Training Limited	Yes	Cineon Training specialises in Immersive Learning and provides Human Performance training and consultancy for a range of industries. The company's aim is to improve human performance through evidence-based training by applying cutting edge research and adopting immersive technologies such as Virtual Reality (VR) simulation to understand and optimise human behaviour in safety critical and high pressured environments. Cineon Training makes use of contemporary scientific research, and psychological theory, combined with Best Practice from a number of high hazard and safety critical industries, such as aviation, nuclear, medicine and defence
Codebase8 Limited	Codebase8 Limited	Yes	Suffolk based SME Codebase8 provides software development capabilities, Artificial Intelligence (AI) and Robotic Process Automation (RPA) technology, automating the low value, mundane and repetitive administrative tasks within businesses.
Connexin Limited	Connexin Ltd	Yes	Connexin is an SME based in Hull in the north of England and is an innovative and disruptive technology company specialising in delivering Smart City and IoT technology services to Local Authorities
Core Business Systems Limited	Core Business Systems Ltd trading as Cascade3d	Yes	Cascade3d Connected Care is a powerful analytics platform connecting elderly and vulnerable people to their families, clinicians, caregivers and call centres. The system provides insights for early intervention, cost saving and enhanced quality of care, allowing clients to live as independently as possible and reduce hospital admissions. Cascade3d Connected Care collects data from unobtrusive elegant smart sensors and medical devices and facilitates video calling via Amazon Echo devices
Core Systems Ni Limited	Core Systems (NI) Limited	Yes	A Northern Ireland based SME, Core Systems specialise in solutions for offenders serving sentences inside and outside prison. They provide specialist software, implementation, support and maintenance services for their solutions. They enable prisoners to prepare for their release and for legal proceedings by allowing them access to digital content in cell on a personalised and locked down device. Core Systems also provide prisoners and service users with the ability to access services and to communicate in a secure way.
Credit Kudos Limited	Credit Kudos	Yes	Credit Kudos is an FCA-authorised Credit Reference Agency and Open Banking provider that empowers businesses and nonprofits, and their customers, to make use of newly accessible financial data for mutual benefit. Credit Kudos helps debt advisors, collections departments and lenders access bank transaction data and input summarised figures into existing systems and processes. Credit Kudos enables organisations to quickly and easily interpret an individual's financial situation, without the need for budgets, bank statements, or payslips.

## RM6094 Spark DPS Supplier Profiles/continued...

CTI DIGITAL LIMITED	CTI Digital	Yes	CTI is a Manchester based SME. We are CTI Digital. Their award-winning team of 150 Digital Strategists, Designers, Marketers, and Developers put digital at the heart of customer organisations. They deliver digital transformation, build, and growth based services for companies ready to champion their market. Since establishing in 2003, they have become an industry leader through their commitment to quality, their focus on technology and their long-lasting relationships with clients. They have 15 years of experience providing innovative, enterprise-level solutions for a diverse range of clients such as The Public Sector's Greater London Authority, to luxury hotel chain De Vere
Current Health Limited	Current Health Ltd	Yes	As health systems seek to shift more health care out of the hospital and into the community, Current Health provides an end-to-end remote patient monitoring and telehealth platform so healthcare providers can maintain visibility of their patient's health at home. Their solution is centred around their own wearable sensor which passively and continuously measures a patient's vital signs. Current Health's AI platform then translates this data to send precise actionable insights to healthcare staff so proactive care can be delivered. This can reduce hospital (re-) admissions, allow teams to prioritise care and improve clinical outcomes and patient experience.
Cylon Limited			CyLon exists to support startups and entrepreneurs building the security technologies of the future. Our CyLon Spark programmes drive the creation of new cyber security businesses and the development of cyber security skills. We have run these in Europe, Asia and the Middle East to date, supporting over 200 aspiring entrepreneurs
Daintta Ltd	Daintta Ltd	Yes	Daintta specialises in helping organisations create their innovation strategy, build innovation functions and operate their innovation capabilities. Daintta also helps organisations deliver innovative data and cyber capabilities.
Dignio Limited	Dignio Ltd	Yes	Connected Care Solution bridging gaps between multiple care providers providing risk-stratified remote patient monitoring. Gathers vital signs, qualitative and quantitative data from the patients, and presents it in a simple, easy to use dashboard for clinicians. Interoperable, scalable and portable-Cloud based software as service, with companion app (both CE Marked, Class1) and integrated medical devices to use by the patients at home or carers in care homes. Multi-tenant functionality, with no requirement for any installation at the client's end.
Docobo Ltd	Docobo Ltd	Yes	Docobo offer digital health solutions to enable remote patient monitoring, case management and population health. Patient cohorts can be identified and provided with our DOC@ HOME remote monitoring platform to enable management of patients in their own place of residence.

## RM6094 Spark DPS Supplier Profiles/continued...

Dr Foster Limited	Dr Foster Limited	No	Dr Foster has established itself as a leading provider of intelligent analytics within the healthcare sector. Their metrics, algorithms, risk models and indicators are utilised worldwide. They have a specialist team of healthcare analysts, statisticians, epidemiologists and data scientists who have significant capability in building algorithms, applying machine learning techniques, linking data, and providing automated processes to derive insight from data. Their bespoke risk stratification predictive algorithm model and population health analysis, has already made significant impact to the NHS by replacing outdated black-box risk stratification systems with closed methodologies, allowing them to deliver invaluable insight from risk stratification
Equilibrium Markets Limited	Equilibrium Markets, Fresh-range	Yes	Equilibrium Markets, Fresh-range are a Bristol based SME whose purpose is to develop food security for generations to come. Their cloud based technology platform enables customers to buy sustainable produce via ground-breaking short, fast, light supply chains with consolidated delivery into kitchens across the UK. Their award winning brand <a href="http://www.fresh-range.com">www.fresh-range.com</a> has enabled thousands of people to enjoy local produce from dozens of primary food and drink producers since its launch in 2014.
Feebris Ltd	Feebris Ltd	Yes	At Feebris, we provide health and care providers with a safer and more accurate way of triaging deterioration and facilitating high quality remote consultations. Our AI-powered platform enables carers to conduct high quality check-ups in their communities, triage health issues proactively, and escalate concerns to clinicians.
FibriCheck	FibriCheck	Yes	As a certified device-agnostic cloud-based application, FibriCheck transforms patient smartphones /-watches into medical grade diagnostic devices, allowing on-demand symptom correlation with digital heart rate and rhythm monitoring for equitable and timely detection of cardiac arrhythmias. With proven equivalence to single-lead ECG, FibriCheck accurately detects, while also providing cost-effective distanced triaging of symptom complaints/presentations, both in and out of practice– addressing backlogs and waitlist management. As a hardware-free, self-monitoring solution that patients can activate instantly, implementation is as easy as giving out a prescription, allowing HCPs to initiate care remotely. Facilitating better case-finding, intervention, follow-up and management of CVD progression. FibriCheck's infrastructure flexibly integrates into existing workflows (adopting centres can be onboarded in as little as a day virtually) and is scalable for use at population (health) level. FibriCheck saves NHS organisations time, without needing a pricy deployment. Our turnkey service includes as a standard: measurement review, physician dashboard, user support, updates/upgrades.

## RM6094 Spark DPS Supplier Profiles/continued...

Fluence World Ltd	Fluence World Ltd	Yes	Fluence is a Birmingham based SME providing a cloud-based platform that maps and analyses content converting unstructured documents into structured data. Fluence then applies forensic linguistics to visualise hidden insight buried within the content. The differentiator is that Fluence has experience of specifically applying this in regulated industries. The primary benefits of the technology are the ability to digitise and extract knowledge from unstructured data and form predictions from unseen content to improve decision making. Using a combination of AI, Machine Learning and Natural Language Processing technologies Fluence helps customers reduce risk and increase compliance, performance and quality. Services are scalable and can be applied to solve a range of challenges. Typical use cases include ensuring compliance to standards, policies, and regulations through analysis of organisational content (automated compliance), deploying best practice in high risk, disparate or heavily regulated organisations (increasing quality quickly and with less resources) on an embedding assurance checks and balances to accelerate performance and digitise content (automated digital transformation) and supporting strategy or internal investment activities through predicting future outcomes from unseen documents.
Fujitsu Services Limited	Fujitsu Services Limited	No	Fujitsu focuses on fast IT technologies such as IoT, analytics, AI, blockchain and quantum inspired computing, helping to accelerate organisations' digital transformation efforts.
Garrison Technology Limited	Garrison Technology Ltd	Yes	Garrison is a UK cyber SME founded in 2014 who have engineered a unique hardware-based isolation technology that allows users to securely access the web and other applications such as VDI. Our technology is currently deployed to various cross-domain requirements across the UK, North America, and European governments as well as top tier financials, telcos, and other major enterprises globally.
GDS Int Holdings Limited	GDS Digital Services Ltd, Outreach Provision for Assisted Living (OPAL)	Yes	GDS International Holdings (unrelated to the Government Digital Service) is a Bristol-based SME. It provides a platform to support IP-based Telecare, Telemedicine and Internet of Things devices within a social care context
HealthBeacon Limited	HealthBeacon Limited	Yes	The HealthBeacon Injection Care Management System™ offers digitally enabled remote care monitoring and support service for patients managing self-injectable medications across all therapeutic areas. A major challenge for people self-injecting medication is adhering to treatment schedules and minimising medication wastage. Medicines prescribed for long-term conditions are not always taken as recommended. This can represent a loss to patients, the healthcare system and society. HealthBeacon is designed to alert over and under use of medication with NHS agreed escalation protocols in place to improve patient outcomes and reduce economic burden on limited health resources. The waste generated from the injectables medications is taken care of and recycled to minimize negative impact on the environment.

## RM6094 Spark DPS Supplier Profiles/continued...

Healthcall Solutions Limited	Health Call	Yes	Health Call improves quality of life through innovative healthtech. As a collective of healthcare professionals and digital specialists, we provide solutions you can trust. We pursue digital healthcare best practice and ensure this is shared across the sector.
Helicon Health Limited	Helicon Health Limited	Yes	Helicon Health exists to advocate and implement new approaches to supporting those with long term conditions and the general population. We do this by delivering people centred innovations to drive clinical and operational benefit and improve the lives of clinicians and patients. We work with both industry leaders and emerging technologies to design and implement solutions to meet specific programme needs in the virtual hospital, care home and at home, neo natal, pediatric and adult critical care networks and LHCRe based cloud solutions. Helicon Health started life in stroke prevention and heart failure and now provides a single invoice and single point of support to maximise scalability and reduce complexity and costs for the Internet of Medical Things including virtual presence/consultation, remote vital signs monitoring, patient generated data collection and health monitoring
Hospify Limited	Hospify Limited	Yes	Hospify is a secure and compliant health data communication platform for everyone in health, both patient and clinician. Our free messaging app can be downloaded from the Apple & Google app stores; the team messaging platform (the Hospify Hub and Web App) can be purchased by hospitals, surgeries, and other healthcare institutions. Together, the Hospify Mobile App, Hub & Web App combine the best of consumer tools like WhatsApp, LinkedIn and Slack, in a manner that's appropriate for use in health.
Hozah Parking Ltd	Hozah	Yes	Hozah is a fully automated parking payment system, which uses number plate recognition cameras to detect when drivers enter and leave a car park and bills drivers accurately. This simultaneously provides drivers with a better experience, reduces local authority costs, reduces friction over the thorny issue of PCNs and can help to reduce emissions.
ICNH Ltd	ICNH Ltd, DrDoctor	Yes	DrDoctor provides a Patient Engagement Platform with multiple modules which can be added in combination to fulfil the organisation's needs. There are three key modules: Appointments, Assessments and Digital Correspondence, and multiple products within each module. The platform is surfaced on patient and management portals, messaging services (SMS, email, IVM) and video consultations. It is facilitated by integration with existing Hospital systems through SSIS, HL7 and FHIR APIs and provides performance reporting through dashboards in the management portal.

## RM6094 Spark DPS Supplier Profiles/continued...

Imageholders Ltd	imageHOLDERS	Yes	ImageHOLDERS is one the world's leading innovators in self service and kiosk solution design, device integration and manufacture, offering insightful solutions to customers worldwide in many sectors including visitor management, check in, voting, banking, government, airports, healthcare and hospitality. We can support any customer requirement and offer a full design and custom manufacturing service to deliver unique automation solutions which improve productivity and aid welfare of both staff and the public across many sectors
InTechnologySmartCities	Intechnologyplc	Yes	Harrogate based Intechnology provides Smart City products designed to add social value, increase sustainability and protect the environment. It has rolled out one of the UK's first city-wide networks for the IoT in Coventry to pilot high-tech public services to improve air quality, pest control, waste management and street lighting.
Intelsant Limited	Howz	Yes	Howz brings together smart devices, an intuitive portal, and analytics to provide remote monitoring within the home. Our devices include environmental and physiological sensors and our easy access app provides reassurance to users and families. Working with the NHS over the last 5 years we have developed an understanding of clinical requirements and the challenges of project delivery in the real world. Our service is built to help you get the most out of technology giving staff more time to spend with patients and patients engaged in their own care.
Invisible Systems Limited	Invisible Systems Limited	Yes	Invisible Systems designs and manufactures Internet of Things (IoT) devices for monitoring Temperature of medicines and vaccines in health clinics and conditions such as Humidity, CO2, Energy and Pressure in real-time. A cloud based software platform (Realtime-Online™) gathers all data and displays information along with analytics on our dashboards, within a comprehensive reporting suite, notification and escalation system. The sensors are calibrated to UKAS ISO10725 standard. The system also helps to meet legislative compliance such as MHRA, CQC, BRC food safety, Legionella HSG274 and EHS. The System is provided as Data as a Service (DaaS) from as little as £3.50/point/month to facilitate instant ROI.
IOT Solutions Group Ltd	IoT Solutions Group Ltd	Yes	IoT Solutions Group helps organisations drive improvements in service delivery and operational efficiency with smart Internet of Things (IoT) applications. We are working with a range of private and public sector organisations across applications such as smart parking, waste management, social care and legionella risk mitigation. We directly manage the whole IoT value chain for our solutions, allowing us to offer tailored deployments without the complexity of component integrations whilst removing unnecessary costs. If you are looking for real-time, remote insight to deliver positive change, we want to help

## RM6094 Spark DPS Supplier Profiles/continued...

Iplato Healthcare Limited	iPLATO Healthcare, myGP	Yes	iPLATO's introduction of an innovative COVID-19 myGP® Engagement Hub Solution enabled centralised mass communications across CCGs, STPs and ICS'. Rather than staff needing to send SMS, letter or phone communications at a practice level, iPLATO's solution sent reliable and up-to-date messaging on behalf of multiple practices across regions, ensuring consistency and accuracy. This builds on iPLATO's track record of developing innovative solutions including myGP®, the number 1 downloaded medical app
Kainos Software Limited	Kainos Software Limited	No	Kainos' experience spans across emerging technologies including AI, machine learning, security, IOT and data, helping to transform citizen experiences and meet user needs by securely embedding intelligence into software to assist human decision making.
Keymed (Medical & Industrial Equipment) Limited	Olympus Keymed	No	Olympus are able to offer vendor neutral solutions for the enterprise management of captured medical pictures and videos as well as live streaming of medical video feeds. We can offer a centralised content management server that can be configured to meet the specific IT requirements of hospitals (e.g.: PACS / DICOM and HL7 / EPR integration) and a customisable cloud based platform for consultant-to-consultant telemedicine for secondary and tertiary care to empower clinical best practice support from anywhere. As a well established supplier of medical devices in the UK for almost 50 years, Olympus are able to offer unparalleled levels of after sale service and training support for the lifetime of the solutions to ensure the best possible value is realised by the hospital.
Knight Frank LLP	Knight Frank	No	The Knight Frank Team is focused on empowering site assessment and decision making by driving a better understanding of place and opportunity. Comprising geographers, surveyors and technical specialists, the team uses advanced analysis and mapping techniques to generate, exploit and democratise location intelligence
Kraydel Limited	Kraydel Limited	Yes	Kraydel's Konnect is a TV-based video calling and remote health monitoring system (using sensors and IoT). It is designed for older adults to improve social connectivity, and support independence, delivering peace of mind to family and carers.
Landmark Information Group Limited	Landmark Information Group Ltd	No	Landmark value added services include Linked Data, Cloud services, Internet of Things, Geospatial and Addressing Data Managed Services, Software application development and support, Hosting, Managed Data, Digital mapping (incl OS) data supply.
Livesmart UK Limited	Livesmart	Yes	Livesmart is a CQC regulated healthcare provider operating in the UK and Internationally. We can deliver software or a full end to end service. Our platform is a preventative health service that combines pathology with lifestyle tracking and analysis to help users to detect disease early and modify lifestyles to prevent chronic disease. It is flexible and adaptable and can be used in a range of other applications from Covid Antibody testing to pre pregnancy health.

## RM6094 Spark DPS Supplier Profiles/continued...

Masimo Europe Limited	Masimo Europe Limited	No	Masimo is a global medical technology company that develops and produces a wide array of industry-leading monitoring technologies, including innovative measurements, sensors, patient monitors, and automation solution.
Mastek (UK) Limited	Mastek	No	Mastek is an enterprise digital transformation specialist that engineers excellence for customers in the UK, US and India. They enable large-scale business change programmes through their Intelligent Automation service offerings using technologies such as Robotic Process Automation and Machine Learning. They have successfully delivered IA programmes for the Public Sector, Financial Services, Retail, Pharmaceuticals and Utilities markets. They work with their clients to drive discovery of their potential IA portfolio, develop proof of concepts to prove business cases and progress application development to successful implementation. They have delivered successful business outcomes by significantly reducing manual effort, achieving step change improvements in the quality of processing transactional volumes and delivering competitive advantage for their clients.
Medopad Ltd (Huma Therapeutics Limited)	Huma Therapeutics Limited	Yes	Huma are a digital health company focussed on creating a world where every person lives their life to the fullest. Our innovative remote patient monitoring platform is in use across 20 NHS organisations, supporting with long-term conditions, rare diseases and COVID-19. This novel solution is helping increase clinical capacity, enhance access and improve patient outcomes. More broadly, Huma are leading development of a new category in medicine known as digital biomarkers to help enable proactive and predictive care.
Mimex Montague Healthcare Limited	Strannik, Strannik Virtual Scanning, Strannik Neuromodulation Therapy, Mimex Montague Healthcare Limited	Yes	Our Strannik software is based a mathematical model or simulation of the relationship between the sensory-neural pathways, the function of the brain and autonomic nervous system, and pathological onset. Such knowledge can be deployed (i) to screen the patient in ca 15 minutes, to do so entirely non-invasively, and more comprehensively than any current technique at ca 10-20% of current costs; and (ii) as a neuromodulation technique which initial research illustrates is ca 85% effective.
Neo Health Tech Limited	neoHealthTech Limited	Yes	neoHealthTech are the expert partners for those designing remote monitoring and diagnostic services for long-term and acute conditions. They offer innovative end-to-end remote monitoring solutions to help measure and diagnose patients' vital signs via virtual wards, atrial fibrillation through a wireless and live trace ECG device and sleep apnoea through an at-home sleep study.
Nplan Limited	Nplan Limited	Yes	nPlan helps our clients understand uncertainty and risk in construction projects using machine learning technology and the world's largest dataset of construction programmes. Our insights are used to change the course of major capital projects, providing greater certainty and reducing costs. We are trusted by Shell, HS2, Kier, and many other clients around the world.

## RM6094 Spark DPS Supplier Profiles/continued...

NYE Health Ltd	NYE Health	Yes	Creating innovative technology to make clinicians' lives easier, workflows more efficient, and information flow between patient and clinician more effective. Why not try our free Nye Phone? : enables quick, easy and secure telephone and video consultations from your practice, hospital department or home
Ocasta Studios Limited	Ocasta, Oplift	Yes	Ocasta Studios is a Brighton-based SME. It provides a 'gamified' learning system called "Albert" to improve knowledge among public-facing staff which uses 'Spaced learning' to counteract the Ebbinghaus forgetting curve effect, where knowledge is lost over time.
Open Medical Ltd	Open Medical Ltd	Yes	Open Medical Ltd is a clinical workflow innovator, using cloud technology to communicate patient progress through defined care pathways across any clinical sub specialty. Our Pathpoint platform is used to manage referrals and triage of over 50,000 patients per month across several NHS Trusts. Pathpoint is developed according to agile customisation principles and can be iterated for any bespoke localised patient pathway
Orion Health Limited	Orion Health Limited	Yes	Orion Health is a global, award-winning provider of health information technology, advancing population health and precision medicine for the delivery of care across the entire health ecosystem. Our patient engagement and remote monitoring solution, Virtual Care, uses advances in digital health technology to address the shift towards care coordination in the community by enabling enhanced management and engagement of patients using technology in their home.
Oviva UK Limited	Oviva UK Limited	Yes	Oviva is a digital behaviour change provider that is commissioned in over 50% of NHS regions today. We support people living with prediabetes, Type 2 diabetes and obesity to lose weight, increase their physical activity levels and better self-manage their conditions, in turn preventing excess costs to the NHS from treatment such as hospital attendances and medication usage.
Painchek UK Limited	PainChek UK Limited		PainChek is the World's first AI Powered pain assessment tool for use in people living with dementia. The App provides a voice for those unable to vocalise their pain. Predominantly used in any care setting where people with dementia are cared for. It provides a medical device in the pocket of care providers that quickly and accurately assesses pain, removing subjectivity.
Patientmpower Limited	patientMpower	Yes	patientMpower (pMp), founded in 2015, is a digital healthcare company based in Dublin, Ireland. pMp's award winning remote monitoring solutions are deployed in a range of pulmonary conditions - including pulmonary fibrosis, cystic fibrosis, lung transplant and COVID-19. pMp works with health systems in the USA, UK & Ireland providing innovative solutions for patients to measure their health status from home, helping healthcare providers to see these patients virtually from their home saving significant time and resources for patients and clinicians.

PFI Knowledge Solutions Ltd Trading as Placecube	Placecube, PFIKS	Yes	Placecube is a Reading based SME. It develops integrated digital services, turning them into re-usable products that government can more easily consume. Co-designed with government, we have already created quick-to-deploy, re-usable solutions for local public services, community collaboration and place-based service directories and we continue to create simple, fast ways to help deliver better digital user experiences with intelligent personalised services, engaged community collaboration and secure information exchange. All our solutions are based on leading open source technologies and an open ecosystem of re-usable digital components that we deploy across government so our clients access proven, well-designed digital services that already exist and don't pay extra for unnecessary re-development. Our approach to re-use and co-creation offers a new style of sustainable partnership that enables our clients to operate their own digital solution and deliver better services at far lower costs than traditional offerings.
Pinacl Solutions UK Ltd	Pinacl Solutions UK Ltd	No	Pinacl Solutions is a Welsh SME focusing on Internet of Things and Smart Places. It has enabled the improvement of existing services and the development of new ones, benefitting citizens and local businesses. Their expertise extends to smart street lighting, environmental monitoring, waste management, smart traffic, smart housing, smart parking or access to free public WiFi
PolyAI Limited	PolyAI Limited, PolyAI	Yes	PolyAI creates virtual voice assistants for customer communication that are capable of human-level conversations over the phone. PolyAI voice assistants can perform contact centre interactions – such as making appointments, updating account details and answering questions – with little training data required. Our voice assistants can be deployed in as little as 2-4 weeks.
PX3 Limited	Px3	Yes	Most organisations now need to record and actively reduce their greenhouse gas emissions, but although IT and work-based travel are responsible for more than 5% of all emissions, getting data for Scope 2 and 3 emissions reporting can be difficult. Px3's Sustainability Assessments examine these areas, producing a comprehensive report in line with international protocols together with an analysis of the potential benefits from using lower-energy devices, cloud services and flexible workstyles. One recent public sector customer commented "We presented Px3's findings at our latest climate emergency meeting and for the first time IT had significantly more information about emissions than any other department and a clear roadmap for the future
Sanandco Limited	Sanandco, MonitorMe	Yes	Sanandco are delighted to include MonitorMe in the Spark Innovation programme. MonitorMe, marries old technology to new by providing an ordinary large button landline telephone with vital signs sensors and linking these directly to an electronic patient record. The user needs no IT skills, wifi connection or mobile signal, the carer or loved one can access the data through any device with an internet connection. Home care for those that really need it!

Scan Computers International Limited	Scan Computers International Ltd	Yes	<p>SCAN has been supplying AI solutions for over 4 years, this developed from its deep understanding of GPU applications in the gaming and video industries which SCAN has also been supplying for over 15 years. The expertise gained from this and the partnership created with NVIDIA led to the CEO of SCAN, Elan Raja, recognising the tremendous synergy between the company's GPU knowledge and its applications with AI. SCAN are therefore, not new entrants into AI but have gained much experience and knowledge from practical deployments especially in the NHS and University sectors. Much of the work starts in a University project and rapidly encompasses practical applications in the NHS. Kings College London in partnership with St Thomas's Hospital NHS Trust and the University of Warwick in partnership with the Coventry and Warwickshire NHS Trust are two examples where SCAN has been involved from project conception. SCAN is happy to supply details of contacts for reference purposes.</p>
Sensium Healthcare Limited	Sensium Healthcare Limited	Yes	<p>Sensium is a unique and practical solution that provides continuous monitoring of key vital signs to detect the earliest possible patient deterioration. Sensium's wireless system and wearable patch accurately monitors and reports heart rate, respiratory rate and axilla temperature every two minutes and can be adjusted to support any clinical pathways. In recent months, for instance, Sensium has been used to support the management of both Covid-19 and Non-Covid-19 patients.</p>
Specialist Computer Centres Plc	SCC	No	<p>SCC's role is to understand customer needs and expectations and bring to life these technologies, working closely with customers to understand the context of their organisations. SCC identifies what customers need rather than what they want. To uncover the underlying needs or problems they then look at innovative ways to solve those problems or meet those needs. SCC's Artificial Intelligence proposition is involved in many technologies, such as (and not limited to): Internet of Things (IoT), Machine Learning, Robotic Process Automation (RPA), Blockchain &amp; Chatbots which spans across multiple verticals such as: Urban Digitisation, Healthcare, Retail, Security &amp; Facilities Management. As this digital revolution unfolds, SCC is at the forefront of these technological developments helping organisations to enhance everyday objects through connecting, interacting and exchanging data.</p>
Spirit Digital Ltd	Spirit Digital	Yes	<p>Spirit Digital's award winning remote health monitoring platform is loved by patients, who enter their vital signs and answer a series of condition related questions. The CliniTouch Vie platform then uses algorithms to produce a Red / Amber / Green prioritized Task list for Clinical teams. Incorporating education modules, individual and group messaging and video calls, the platform also provides satellite based air quality data. Outcomes for patients include 67% reduction in avoidable hospital admissions, improved health education confidence and condition management. Benefits for clinical teams include efficiency savings (up to 4.8:1 ROI), caseload productivity improvement and, as one respiratory nurse said "it enables me to keep a virtual eye on my patients."</p>

Trint Limited	Trint Limited	Yes	Trint is the AI-driven productivity platform that takes professionals beyond automated transcription, helping them to unlock the value of the spoken word. Trint converts audio and video files to full transcripts in moments: the text is stitched to the audio, letting teams work collaboratively to search, verify, edit to 100% accuracy and export. Trint's secure platform easily integrates into existing workflows - capture, find and share recordings of government proceedings, depositions, interviews, meetings and more.
Tunstall Healthcare (UK) Ltd	Tunstall Healthcare (UK) Limited	No	Tunstall's Integrated Care Platform (ICP) is an approved, tried and tested Class 1 medical device that can enable health and care provider organisations to monitor patients and individuals remotely. The combination of the app and software enables the solution to be rapidly deployed and can support discharged, isolated and quarantined patients.
Uniotec Ltd	Uniotec Ltd	Yes	Uniotec provide bespoke IoT solutions aimed primarily at solving local authority challenges. We combine innovative LPWAN sensors with our bespoke software solutions to deliver service improvements, process efficiencies and cost savings for our clients.
Upstream Outcomes Limited	Upstream Health	Yes	Upstream's new solution Bridgit is designed to empower family carers to deliver preventative care to their loved ones and in doing so reduce demand on stretched services. Bridgit includes inexpensive products in the form of a home hub, watch and supporting devices which can be provided to elderly clients with minimum installation and no requirement for internet connection or mobile phone. Our solution passively collects 40 different data points from the elderly user and their home. It also provides an accessible interface to send and receive simple messages and health assessments. These products connect to our AI and, via our mobile app, direct family members on preventative care actions.
Urban Intelligence Ltd	Urban Intelligence	Yes	Urban Intelligence is a property technology business that has pioneered a piece of software called SiteScore for use in town planning and development. SiteScore has the ability to appraise 29 million land parcels in England and Wales for their development potential based on agreed methodologies. We do this by factoring in over 500 data sets from planning policy and environmental constraints to accessibility to local services and transport - giving us a more complete view of a site's sustainability and viability. Our capacity to highlight development potential has no limits, from individual sites to entire counties. We can work with our clients to understand their particular needs and score sites accordingly, offering a unique cutting-edge solution that is both faster and more cost-effective than traditional consultants.

Urbantide Limited	UrbanTide Limited	Yes	At UrbanTide, our mission is to create a sustainable world with AI. We do this with uSmart our enterprise-scale data innovation platform and our unique AI catalogue. Our USPs are that uSmart not only unlocks siloed data with advanced sharing capabilities, from API curation to open data publication. We also enable organisations to integrate and apply machine learning and AI algorithms to automate insights and help people and places work better and smarter with our growing AI Catalogue.
Visiba Limited	Visiba Care	Yes	Visiba Care is a scalable virtual clinic software that enables healthcare providers to meet patients online through their own branded virtual clinic, which may include one or several digital receptions. Healthcare professionals can communicate with patients via asynchronous messaging, video consultations with up to 5 participants, and dynamic forms.
Wallet.Services (Scotland) Limited	Wallet.Services (Scotland) Limited	Yes	Wallet.Services connect organisations with trustworthy data to cut out red tape providing citizens and businesses with a streamlined and secure digital life. Their enterprise platform SICCAR helps government organisations and businesses collaborate more efficiently and in ways that have not been possible before, using the latest in secure data sharing technology. Wallet.Services work with government to solve collaboration challenges where outcomes can only be achieved with unanimous consent in areas such as citizen entitlements and benefits, business licensing and conveyancing and approvals processes generally. Wallet.Services also tackle complex supply chain issues within manufacturing & resources industries, such as protecting commercially sensitive data whilst facilitating transparency in highly regulated processes. Whatever the cross organisational application, Wallet.Services ensure collaborative working is fully optimised by securing data and the people and organisations that own it.
We Build Bots Ltd	We Build Bots Ltd	Yes	We Build Bots' platform, IntelAgent helps Public Sector organisations provide better, faster, cheaper access to their services. Citizens and internal customers can now use AI powered bots to get automated answers to common questions, and to execute processes like paying bills or checking company policies. Deployed across web, in app, on smart speakers and across social messaging channels, IntelAgent is significantly reducing email, call and other non automated interactions, leaving teams to deal with more value add work.
Xim Limited	Lifelight	Yes	Lifelight is a game changing technology that allows any smartphone or tablet device to measure blood pressure, pulse and breathing rate simply by a patient looking into the device's built-in camera for 40 seconds. Lifelight is a CE marked non-contact device which avoids unnecessary contact for both patient and healthcare worker as well as minimising patient distress. Completely contactless, with no additional hardware needed, it saves healthcare staff time, while improving patient experience.

Yokeru Technology Limited	Yokeru	Yes	Too many peoples' needs are unheard. We are working to change this. Yokeru's automated call centre is a human-like engagement tool for collecting critical information from large groups of people. Yokeru provides the same outcomes as traditional call centres at a fraction of the cost and is adaptable to many applications, such as a covid-19 support line, public health announcements, benefits notifications and routine check-ins on vulnerable individuals. Yokeru's platform is digitally inclusive as it uses the phone line, unlike apps which require smartphones. We are excited to be included in Spark DPS and hope to work with the CCS to grow the platform nationwide
You.Smart.Thing.Limited	You. Smart. Thing.	Yes	The 'You. Smart. Thing.' cloud-based Travel Assistant platform helps the public sector, together with destinations and transport network operators manage people-flow and travel demand in a Covid-conscious and environmentally sensitive way. The simple to deploy technology is easily embedded in public facing websites and apps capturing when, where and how people intend to travel. Bespoke routing and real-time messaging provide actionable data insights via a dashboard or API, enabling proactive management of transport network capacity, leisure and commuter traveller intent and visitor experience.
Zesty Limited	Zesty	Yes	Zesty is a leading provider of patient portals for UK hospitals. A multi award winning UK digital health company and wholly owned subsidiary of Induction Healthcare PLC, we are committed to transforming clinical pathways in acute hospitals by putting the right technology in the hands of the patient. This patient-centric, technology-driven vision delivers superior patient outcomes while reducing whole-system costs for hospitals. It alleviates the strain on hospital resources and embeds a long-term foundation for future improvements.
