CARBON NET ZERO

Finding the right path to work towards Carbon Net Zero is becoming increasingly challenging and brings together many aspects of your travel solutions. At CCS Travel, we have created a guide for you to use to gauge where you are and how to make initial improvements towards Carbon Net Zero.

STEP 1: ASSOCIATED AGREEMENTS

Suppliers on CCS agreements can help you on your journey to Carbon Net Zero.

Vehicle Telematics Hardware and Software Solutions

Provides data on fuel consumption, vehicle tracking, and driver behaviour, enabling you to optimise vehicle usage, reduce number of journeys, and reduce overall energy consumption.

Public Sector Passenger Transport - Taxi & Coaches

Provides data to help understand your passenger travel and journey profiles to help you plan, manage and optimise your travel to reduce carbon emissions overall.

National Fuels

Provides data on monthly fuel consumption, enabling you to plan, manage demand, and reduce consumption. Bio fuels also available.

Public Sector Travel and Venue Solutions

Provides data that can be used to understand your travel and journey profiles to help you plan, manage and optimise your travel to reduce carbon emissions overall.

Now you understand your data, you'll be able to identify opportunities to manage your demand, people and reduce consumption. Here are a number of efficiency measures you should be considering

STEP 2: ASSOCIATED AGREEMENTS

Suppliers on CCS agreements can help you on your journey to Carbon Net Zero.

Public Sector (Global) Travel and Venue Solutions

Provides data on journey usage and methods to help identify sustainable travel improvements, and reduce fuel consumption, cost and number of journeys while also providing alternative transport and accommodation options to combine journeys.

Public Sector Passenger Transport Services - Taxi & Coaches

Provides data on travel usage to optimise your transport. Provides access to sustainable transport with a range of flexible options to transition towards more sustainable travel or overall reduced travel in totality.

Vehicle Charging Infrastructure Solutions

Provides a route to vehicle charging infrastructure and support services to allow for easy transition to electric vehicles.

Vehicle Hire

Provides access to short term, flexible and green fleets to allow for support during transition and try before you buy of greener fleets. Car share options are also available to further reduce emissions.

Taking positive steps towards Carbon Net Zero – the following opportunities may support you on your specific Carbon Net Zero journey.

STEP 3: ASSOCIATED AGREEMENTS

Suppliers on CCS agreements can help you on your journey to Carbon Net Zero.

Tyres and Associated Services

Access to premium and cross season tyres to extend the life span of the tyres and therefore reduce waste. Education on driver behaviour to reduce tyre wear and to extend the life of the tyre by using them until they reach the minimum tread depth.

Public Sector (Global) Travel and Venue Solutions

Provides a range of transport to help you identify the most sustainable options as well as opportunities to eliminate the need for travel and optimise your journey and route planning. Also provides access to carbon offsetting schemes.

Vehicle Charging Infrastructure Solutions

Provides a route to vehicle charging infrastructure and support services to allow for easy transition to electric vehicles.

Public Sector Passenger Transport Service - Taxi & Coaches

Provides access to sustainable transport options with a range of vehicles available to transition towards more sustainable travel. Journeys can be optimised with adaptable vehicle size and transport schedules for a more sustainable yet flexible solution.

Public Sector Global Travel and Venue Solutions

This agreement provides customers with a range of travel management solutions covering transport for both domestic and international travel. Provides customers with flexible travel solutions and the opportunity to try out a mix of travel methods to find the most cost-effective and sustainable option for you. Transport including air and rail are provided by a variety of suppliers who provide complex travel services locally, which can be booked while abroad, global contract management and access to consolidated management information to support travel optimisation. The Government's CO2 and Green agenda are incorporated into the framework to help reduce the need for travel overall and provide carbon-offsetting options to ensure you meet your Carbon Net Zero goals. Accommodation support is also available to help you amalgamate journeys and reduce overall travel.

Public Sector Travel and Venue Solutions

This agreement gives customers access to travel management solutions covering a range of transport methods to find a solution that's right for you. This not only provides customers with flexible travel solutions, but also provides the opportunity to try out a range of travel methods to find the most cost-effective and sustainable option for your needs. This framework provides you with online and offline booking services for all your travel, venue hire and accommodation needs which can facilitate your transition to a more sustainable travel plan. Analysing your journey and trip profiles, amalgamating journeys through overnight stays, substituting for more sustainable transport types or even eliminating the need to travel in general can help you to reach your Carbon Net Zero goals.

Public Sector Vehicle Hire Solutions

This agreement will give customers access to a wide range of short or long-term hire vehicles including cars, light commercial vehicles, and heavy goods vehicles. This not only provides customers with flexible short-term travel solutions, but also provides the opportunity to try out electric and hybrid vehicles before they commit to purchasing. This agreement also provides car share solutions which eliminates delivery and collection, providing you with short term travel needs and a further reduced carbon footprint and cost therefore giving you greater flexibility and further helping you reach your Carbon Net Zero goals. Vehicles hired through this framework are under 2 years old therefore helping you move away from the use of grey fleets and therefore helping you reduce your organisation's carbon emissions.

Vehicle Telematics Hardware and Software Solutions

Through the Vehicle Telematics agreement suppliers can offer products and services to enable you to capture and analyse vehicle data that facilitates your Carbon Net Zero journey. Documented data on fuel consumption, vehicle tracking and driver behaviour can be used to identify safety improvements and cost reductions based on the whole life cost of vehicles used in your travel solutions. Analysing this data can support evidence-based decision making to make appropriate decisions to achieve your Carbon Net Zero goals. Use of this framework can help organisations improve utilisation of travel, optimise journey planning and highlight areas of unnecessary or alternative travel.

National Fuels

Within our National Fuels agreement, suppliers will provide data on fuel volumes on a monthly basis, which will help customers plan going forward as they work towards their Carbon Net Zero goals. Consumption volumes will vary with seasonal demand. Customers will be able to plan this by using the data received from the suppliers, overall managing demand and reducing fuel consumption. Customers can also use this agreement to choose bio fuel to assist with efficient solutions to help work towards Carbon Net Zero goals.

Tyres and associated services

This agreement is for the supply and fit of tyres and associated services. Buyers can use this framework to ensure the safe and environmentally friendly disposal of your tyres once they have reached their end of use. Suppliers can also provide premium quality tyres to ensure a longer life of the tyre which reduces waste and helps you achieve your carbon net zero goals. Cross season tyres are also available to ensure safety and usage across all weather conditions to further reduce cost and waste, further adding to your sustainability goals.
