Why work with us

We have great experience in powering the public sector, from being the biggest buyer of gas and electricity in the UK outside of the big six, to bringing to market the largest public sector water framework in the UK.

By using our frameworks you can benefit from:

-  **savings** - we consistently secure the best price possible from our suppliers, even in volatile markets
-  **experience** - our traders have an unparalleled understanding of the UK gas and power sector
-  **best in class** - our performance against a highly competitive market is consistently excellent
-  **transparency** - our commission is low and completely transparent and we've got some of the most competitive supplier management fees around
-  **biggest energy portfolio in the public sector** - so you benefit from our bulk buying power

Our frameworks

We offer a wide range of products that allow you to access the deals that are best for you, including:

Half Hourly Electricity Supply and Ancillary Services (RM1075) supplier: EDF Energy

Non Half Hourly Electricity Supply and Ancillary Services (RM999) supplier: British Gas

Natural Gas (daily/non daily metered) Supply and Ancillary Services (RM1076) supplier: Corona

These single supplier frameworks offer a range of energy services that cover management, conservation and renewable services.

Our trading team manages trading on behalf of all our customers to ensure we deliver value for money within a complex and fast moving market.

Water, Wastewater and Ancillary Services (RM3790) This brand new framework provides access to England's first ever competitive water retail market. We have collaborated with 5 other major buying organisations to secure better customer service, reduce your consumption and reduce your water bills.

Energy Demand Side Response (RM3792) Access national grid schemes which offer revenue and generate savings from reducing your consumption from the grid during peak times. This also helps National Grid secure and balance the national electricity system.

National Energy Performance Contracting (RM3768) Working in partnership with GLA and Local Partnerships to support public sector in delivering retrospective energy efficiency projects which will reduce consumption and energy bills.

Street Lighting (RM1089) Accessible from Lot 9 of the Traffic Management Technology framework, this provides goods and services for all street and exterior lighting requirements.

National Fuels (RM3801) Encompassing a bulk supply of liquid fuels for your heating, automotive and marine oil needs on a regional basis. As well as, lubricants, greases and additional associated products.

Coming soon / under development:

Utilities Management Software, Metering & Ancillary Services (RM3800) An end-to-end data management solution for all utilities requirements, including a bureau services provision. This will provide users with key information to unlock savings and efficiencies across their utilities portfolios.

Energy Switching Services (RM3809) An online energy price comparison and switching website for lower consuming public sector customers.

Heat Networks & Electricity Generating Assets (HELGA) - investigating options to support public sector deliver electricity and heat generation projects.

Why wait? start saving today
