## What is HELGA?

The Heat Networks and Electricity Generation Assets (HELGA) agreement allows public sector bodies to procure a range of energy demand management and generation services through a flexible, easy-to-use and OJEU compliant dynamic purchasing system (DPS).

Users of the HELGA agreement have access to a wide range of market-leading suppliers that provide a range of services from simple energy auditing to complex installation projects. Delivering the agreement through a DPS drives value for money and customers benefit from a streamlined procurement process which reduces the cost of the tender and ensures compliance to public procurement regulation.

## Why work with us?

Whatever stage in the energy journey you are at, HELGA offers a variety of solutions to optimise your demand management and take advantage of income generation opportunities.

### Features and Benefits:

- **savings:** we can help you make significant savings through better buying and consolidation of your requirements
- **compliant:** OJEU compliant agreement. All suppliers undergo a selection process and credit check before being appointed onto the DPS, providing reassurance
- **choice:** access to a range of suppliers providing services that meet your needs
- **free to access:** no customer fees or charges, all our fees are recovered from the supplier
- **advice:** access to a dedicated and experienced team providing assistance throughout the procurement process

The HELGA DPS employs a flexible filtering system that has been designed to encourage regional and SME suppliers to take part. Customers are able to build a project according to their specific requirements, using the filtering system to easily identify appropriate suppliers by product or service, contract value and region.

## Services available through HELGA

Choose from 4 distinct types of services, or a one stop shop to capture any combination of services.

### 1. Energy Advisory, Design and Technical Services:

- Services relating to the advice and design of any demand management or generation type

### 2. Delivery Services:

- Delivery services to install, manage and maintain any demand management or generation type

### 3. Energy Purchase Agreement:

- Provision of Energy Purchase Agreements through direct or indirect opportunities

### 4. Commoditised Products:

- Access to commoditised products through bulk purchasing

### 5. One Stop Shop:

- One stop shop solution to deliver full end-to-end advisory, design, delivery, energy purchase agreements, and commoditised products.
